Greenside • one page

Verdict: Not yet. The unit economics work; the proof does not exist yet.

The problem. Dutch golf clubs run their members, tee times and invoices on club software, and most give their members only a web page saved to the home screen. E-Golf4U is being retired, so its clubs must choose a new system now, and their volunteers dread the switch.

The customer. Boards and club managers of the 263 NGF clubs, first those leaving E-Golf4U (9-hole volunteer clubs to 27-hole commercial courses).

The offer: Greenside Founding Club. The club's own app in the App Store and Google Play under its own name, plus the club management software. We do the switch (import, invitations, printed guide for older members, Saturday helpline). Three-month pilot next to the current system, with success criteria in writing; miss them or want to stop, pay nothing. Data export at any time; 12 months' notice and full handover if Greenside stops.

Price per month (excl. VAT). € 199 (9 holes), € 449 (18 holes), € 599 (27+ holes). The first ten clubs, pilot starting before 1 July 2027: € 179 / € 399 / € 499, fixed for two years, no migration fee. No commission on what members buy.

key number	
Price	€ 364.00 a club-month
Profit margin at plan	77% per club-month
Break-even	2 clubs paying at once
Year 1 operating profit	€ -954
Startup spend	€ 10,423
Cash needed before it pays for itself	€ 12,174
Startup money earned back	not in year 1
Buyer panel	0 buy · 20 pass

With the founders paid € 2,500 each: break-even **16 clubs**, year 1 **€ -60,954**, cash needed **€ 71,377**.

The evidence

- **Product:** working and frozen as `pilot-v1`; the first club's branded app (Golfclub Zwolle) is built, not yet live.
- **Buyer panel** (20 simulated club decision-makers, run twice): **0 buy**. Main reason: no live reference club and only two founders. 19 of 20 say a call with Zwolle's board after a season would change their mind. Price is not the blocker for 18 and 27+ holes.
- **Competitor gap:** most Dutch members get a web app (E-Golf4U, Golfdashboard, Nexxchange portal); the one vendor with branded store apps rates about 2 out of 5. A club system costs about € 350–450 a month for an 18-hole club (Nexxchange's listed € 200 + € 50 per user, an estimate).
- **Real test:** not run yet. Test 1 (Zwolle's signed pilot with a paid follow-on, 2 letters of intent from other boards) runs until 18 December 2026; Test 2 is Zwolle's pilot from 1 March 2027 (40% of members active by week 12).

What the money is for. € 10,423 start-up: an external security test (€ 7,500), the lawyer for the data processing agreement, privacy statement and contracts (€ 2,500), registration and set-up; plus running costs of € 398 a month until 2 clubs pay.

The ask. None yet, on purpose: the founders cover the € 12,174 themselves and go live at Zwolle first. After Zwolle's pilot (end of May 2027), with real adoption numbers, the question becomes whether to bridge founder pay (€ 5,000 a month) until ~16 clubs pay.

Simulated buyers and projected numbers; real boards and real quotes confirm them. Not financial, legal or tax advice.

Greenside • Business plan

Verdict: Not yet

- ✓ Each club-month earns € 318.50 before fixed costs (88% contribution).
- ✗ Year 1 operating LOSS: € 954.
- ✓ Break-even is 2 clubs paying at once against a capacity of 25.
- ✗ 0 of 20 simulated buyers buy (0%, the bar is 25%).

Startup spend	€ 10,423
Cash needed before it pays for itself	€ 12,174
Startup money earned back	not in year 1
Buyer panel	0 buy • 20 pass

The idea

- What it is: a white-label member app plus club management software ("clubbeheer") for Dutch golf clubs; every club gets its own branded app in the App Store and Google Play, run on one shared platform.
- Who it is for: Dutch golf clubs with their own course (263 clubs are NGF members, 275 courses), bought by the board and run day to day by the secretariat, the finance volunteer and the marshal. The members (golfers) use the app.
- What it sells, at what price (the original idea; current prices are in `founder/pricing.md`: € 199 / € 449 / € 599, founding € 179 / € 399 / € 499, no "two months free"): a monthly licence by club size: € 249 (9 holes, up to ±700 members), € 449 (18 holes, ±700–1,100 members, the standard), € 599 (27+ holes). Founding-club price € 399 a month, fixed for two years, for the first ten clubs. One-off migration fee € 750 (9 holes) to € 1,500 (18+ holes). A three-month pilot, then a yearly contract; two months free when paid a year up front. No commission on what members buy in the app.
- Where and how: the Netherlands. Sold directly to clubs by the founders (demo, pilot, contract). Delivered as a branded iOS/Android app per club (built from one codebase) and a web-based club management system; members are imported from the club's current system and invited by e-mail with a login code.
- Budget and constraints: pre-revenue. Two founders; the software is built with Claude Code. A working pilot ("pilot-v1") is finished and frozen; the first pilot club (Golfclub Zwolle) has a branded version in its own colours and logo, not yet live. Production accounts (database in the EU, e-mail, hosting, Apple/Google developer accounts) still have to be set up. No outside funding mentioned.

Summary

What it is. Greenside gives a Dutch golf club its own member app in the App Store and Google Play, plus the club management software behind it, and does the switch for the club. It is for the boards of the 263 NGF clubs, first those that must leave E-Golf4U.

Verdict: Not yet (computed by `compile.py` from `founder/numbers.json` and the buyer panel). Two of four checks pass, two fail:

- ✓ **Margin:** each paying club leaves **€ 318.50 a month (88%)** at the founding price mix of € 364.
- ✓ **Break-even:** **2 paying clubs** with the founders unpaid, within the ~25 clubs two people can serve.
- ✗ **Year 1:** an operating loss of **€ 954**, because only Zwolle pays from month 4 and the next clubs wait for Zwolle's proof (3 paying clubs by month 12).
- ✗ **Buyers:** **0 of 20** simulated buyers buy (bar 25%), with the old pitch and with the improved Founding Club offer.

With the founders paid € 2,500 each, break-even is **16 clubs** and year 1 loses **€ 60,954**.

What has to change, and which skill changes it.

1. **Proof, not a better pitch.** 19 of 20 buyers say what would change their mind: Zwolle live for a season and a call with its board. No offer change moved the buy rate (`/founder-offer` ran twice). Only Zwolle's real numbers can; then re-run `/founder-consumer` with them, and trust real boards over the panel.
2. **Year 1 into profit** is a small step: Zwolle paying from month 1 instead of after a free pilot gives € +2; Expo's Starter plan gives € -90 (`/founder-cfo` what-ifs). Neither fixes the real issue, which is pay for the founders.

Where the board and the panel agreed, and where not. Both put proof at Zwolle first, and both see switching effort and "two founders" as the doubts. The board voted "fund, if" (5.0 / 10) and saw a sellable offer; the panel bought nothing. The board's biggest fear (members won't use a club app next to GOLF.NL) came up less in the panel than trust and timing did. Price is not the blocker for 18 and 27+ holes; for 9 holes it was, and the list price is now € 199.

The biggest risk is that Zwolle's members don't use the app: without that, nothing else sells. Plan: launch kit (import done for them, printed guide, invitations in groups, Saturday helpline), a weekly count of active members, and a hard stop on outreach if fewer than 20% are active by week 4.

What it takes to start. About **€ 12,200** cash with the founders unpaid (pentest € 7,500, lawyer € 2,500, running costs), and **Test 1:** Zwolle signs a pilot contract with a paid follow-on by 13 November, plus 2 letters of intent from other boards by 18 December (`founder/launch.md`).

This week: meet Zwolle's board. Fix the go-live date, the success criteria and the founding price from month 4 in a pilot contract, and ask permission to use their name later.

The panel is simulated buyers and the numbers are projections; real boards and real quotes confirm them. Not financial, legal or tax advice.

What the board said

Vote: 3 × FUND IF · **average score** 5.0 / 10 (Offers 5, Monopoly 4, Product 6)

The board does not pass, but it does not fund on the pitch either. All three want measured proof from Golfclub Zwolle before more clubs are signed or more is built.

Risks raised by more than one member (most dangerous first)

1. **Members may not use a club's own app next to GOLF.NL** (all three). GOLF.NL is free, books tee times and has 325,300 active users. If members don't adopt the club app, the extras, guest fees and sponsor revenue never show up, and the club's value case falls apart.
2. **No proof yet** (Offers, Product). No club has paid, the pilot is not live, and the € 19,000–45,000 value per club is an unmeasured estimate. One of its levers ("pause instead of cancel") has already been removed from the product.
3. **Switching from the incumbents is hard** (all three). Clubs run E-Golf4U, Nexxchange or IntoGolf. Moving member data, finance and volunteers is effort and risk for the club, and IntoGolf already publishes club-branded apps.
4. **The difference is easy to copy** (Offers, Monopoly). "No commission" is a price argument an incumbent can match. Nothing compounds across clubs (no network effect), and the code itself is no barrier.
5. **A small, flat market** (Offers, Monopoly). About 263 clubs. All of them on the standard tier would be about € 1.4M a year: a business to own, not one that grows big.

Where the members disagree

- **What the business is.** The Product lens sees a well-made product whose problem is focus: too many things, no one thing. The Monopoly lens sees an incremental improvement with no moat, whatever the focus. The Offers lens sees a sellable offer that only lacks proof.
- **Score spread: 4 to 6.** The Product lens is the most positive, because the working pilot and the volunteer-first design are real. The Monopoly lens is the most critical, because nothing stops a copy.

Conditions: the checklist for the rest of the pack

Proof at the pilot club

- ☐ Name the one thing Greenside does for members, in one sentence, that GOLF.NL does not (Product). → `/founder-offer`, `/founder-marketing`
- ☐ Agree success metrics with Zwolle **before** go-live: weekly active members, in-app revenue the club would not otherwise have had, hours saved at the desk (Offers, Product).
- ☐ Zwolle goes live, and after the 3-month pilot reports real member adoption and volunteer use (all three).
- ☐ Zwolle converts to a paid yearly contract (Monopoly).

Market and competition

- ☐ Competitor map with what clubs pay the incumbents today, contract terms and switching costs, showing a gap the incumbents cannot close quickly (Monopoly, Offers). → `/founder-competitors`
- ☐ Will members open a club app next to GOLF.NL, and will a board pay € 449? (Offers, Monopoly). → `/founder-consumer`, then `/founder-pricing`
- ☐ A named beachhead of at most about 20 clubs (for example 9-hole clubs, one region, or clubs on one incumbent) with a plan to sign at least 5 founding clubs (Monopoly); at least 3 signed before the platform is built further (Offers).

Money

- ☐ Cost to win one club, cost to run one club, and the number of clubs to break even (Offers, Monopoly). → `/founder-cfo`
- ☐ A guarantee the business can afford, tied to the "licence earned back" statistic already in the product (Offers). → `/founder-cfo`, `/founder-offer`

Product before go-live

- ☐ Finish the seams: production e-mail for login codes, legal documents, the bar-staff role, the ball-machine decision, and a written answer to who owns the member record when Greenside and the old system disagree (Product).
- ☐ Support: who helps a club or a member when a login code doesn't arrive on a Saturday morning (Product).
- ☐ Durability: what Greenside builds that a copycat cannot have in month six (data across clubs, integrations, a brand with club boards) (Monopoly).

The strongest version the board can see

Not "a club app with everything", which the pitch comes close to, but **the member platform that earns the club money, proven at Zwolle**. One promise: the app pays for itself, with the "licence earned back" figure the product already tracks as the proof, backed by a guarantee. The member experience is focused on what GOLF.NL cannot do because it is not the club's: the club's own account (bar tab, extras, guests, invoices), the club pass and club news. The club gets migration, volunteer training and a member-launch kit, so switching costs it almost no effort. It starts with a narrow beachhead of clubs (the founding-club offer, with a deadline), and builds what a copycat cannot quickly have: integrations with the systems clubs already run and a track record with club boards. This is narrower than the pitch: less "everything for the club", more "proven extra income for the club, with members who actually use it".

The competition

Research date: 8 October 2026. Public sources only, every fact linked.

Limits of this research, read first. The sites of the vendors themselves (intogolf.nl, e-golf4u.nl, ngf.nl, compupartner.nl, apps.apple.com) could not be opened from the research environment (blocked by its network policy), so facts come from search results that quote those pages and from club websites. **No vendor publishes a price:** the price comparison below is therefore open, not guessed. Ask clubs during sales conversations what they pay today.

1. Who is there, most direct first

#	Name	Type	What they sell	Member app	Rating
1	IntoGolf (incl. Proware, IkGaGolfen)	direct	All-in-one: member admin, tee sheet, POS, invoicing, competitions (intogolf.nl , unTill)	Native branded app per club in the stores, e.g. Sallandsche, Golfpark Wilnis, De Kroonprins, De Batouwe, Lochemse (App Store developer page), Amelisweerd (Google Play)	IkGaGolfen v3: 1.9 on Google Play (21 reviews), ~2.0 on the App Store (Google Play , App Store reviews)
2	Nexxchange (GolfSuite, took over E-Golf4U)	direct	Cloud club management; >400 courses in the EU (2023) (IAGTO release); member portal (handleiding)	Web portal	not found
3	E-Golf4U (being retired)	direct, legacy	Scores, competitions, tee times, NGF card (Veldzijde , Welderen)	Web app (m.eg4u.nl), "niet via de App Store of Play Store" (Veldzijde)	not found
4	Golfspot + TeeControl + Parrow ("Golfdashboard")	direct	Golfspot: "the Customer Data Platform for the golf market" (golfspot.io); TeeControl: cloud tee sheet (teecontrol.com); Parrow: Dutch competition module (Prise d'Eau)	Web app , "niet te downloaden" from the stores (De Hooge Rotterdamsche)	not found
5	GolfBox	direct (international)	Member/handicap admin, tee times, kiosk, member app; vendor claims >1,000 clubs (golfbox.net)	App	Dutch customers not confirmed
6	Compu Partner (CompuGolf)	direct	Club software with a mobile app (compupartner.nl)	App	details not readable
7	Golf Genius (Club App)	indirect	Competitions + fully white-labelled club app (Golf Business News); replaced by Parrow at Prise d'Eau (source)	Branded app	not found
8	GOLF.NLapp + GOLFGO (NGF)	indirect	Free: NGF card, scorecards, handicap, tee times at ±65 courses via GOLFGO (NVG), pay at booking since late 2025 (NGF, March 2026), "Zoek en boek" from July 2026	National app, "Dé app voor golfend Nederland!" (golf.nl/app)	4.2 on Google Play (1,900), 4.5 on the App Store (3,200) (App Store , Google Play); "more than 130,000 monthly users" (iO)
9	CPS, Lightspeed Golf, Teecontrol	indirect	Tee-sheet systems read by GOLFGO (NGF)	via GOLF.NL	not found
10	Golf@	indirect, minor	Meeting platform for golfers, clubs and pros; last update listed 2016 (App Store)	App	3.0 (2 reviews)

#	Name	Type	What they sell	Member app	Rating
-	Website + e-mail + phone at the desk	substitute	What clubs do without an app	none	-

2. Price

Not published by any vendor (IntoGolf, Nexxchange, E-Golf4U, Golfspot, TeeControl, GolfBox). The only public number: one E-Golf4U POS link module "vanaf € 11,00" a month ([leza.nl](#)), which says nothing about a full licence. IntoGolf sells modules "die passen bij uw organisatie" ([intogolf.nl](#)), so prices are quote-based. Lowest / median / highest for a comparable licence: **unknown**. One switching story mentions price: Golfclub Brunssummerheide moved from E-Golf4U to Proware in 2020 citing "een flinke kostenbesparing" ([readkong](#)).

3. Positioning map

Axis 1: how much of the club's back office it runs (tee sheet only → everything incl. finance). Axis 2: what the member gets on the phone (nothing / web app → national app → the club's own native app in the stores).

4. What customers complain about

Few public reviews exist for B2B club software; most evidence is from club notices and app-store reviews. Themes with fewer than three sources are marked **thin**.

- 1. Forced migration, with friction** (5+ sources). E-Golf4U is disappearing: "e-Golf4U gaat per 26 maart 2024 verdwijnen" ([Uithoorn](#)); clubs move to Nexxchange ([Putten](#), [Bilthoven](#), [Vught](#)), to IntoGolf ([Veldzijde](#), [Hildenberg](#)) or to Golfspot/TeeControl/Parrow ([De Hooge Rotterdamsche](#), [Landgoed Nieuwkerk](#)). One club says about half the E-Golf4U clubs had moved to Nexxchange by November 2025 ([Overbrug](#)); the Veluwe Golf Club postponed its migration after a test migration showed imperfections ([Veluwe](#)). Nieuwkerk's board: not unhappy, but "het systeem houdt op te bestaan".
- 2. The member app is a web page, not an app** (5+ sources). Clubs publish step-by-step guides to put a shortcut on the home screen for E-Golf4U ([Semslanden](#), [Holthuizen](#), [Havelte](#), [Ter Specke](#)), Proware ("U vindt deze app niet in de appstore", [readkong](#)) and Golfdashboard ([Tespelduyn](#)). The Hollandsche Golfclub's web app cannot be used by green-fee players ([HGC](#)).
- 3. The one native branded app rates poorly** (3 sources). IkGaGolfen v3 (IntoGolf): 1.9 on Google Play; App Store reviewers (2022–2024) report failed logins, not finding their club, and a white screen after picking a tee time so players can't be added ([App Store reviews](#), [Google Play](#)). At De Kroonprins's IntoGolf go-live, members' familiar friend groups for booking were replaced by "bekende spelers" ([Kroonprins](#)).
- 4. Several systems for one club** (thin, 2 sources). Golfdashboard members still need a separate Parrow app for competitions ([Golfmiddenbrabant](#), [Amelisweerd](#)).
- 5. GOLF.NL got slower and shows ads after an update** (thin, 1 review on [Google Play](#)).
- 6. No-shows on reserved tee times** (thin, 2 sources), now being solved by paying at booking in GOLF.NL: "vrijwel geen no-shows meer" at De Compagnie and Harderwold ([NGF](#)).

5. The gap

A real, polished app in the club's own name, in the app stores, on top of an administration that is moving anyway.

- Most Dutch members get a **web app** (E-Golf4U, Proware, Golfdashboard, Nexxchange portal). The only vendor with native branded apps per club (IntoGolf) is rated about **2 out of 5** with login and booking failures. Nobody combines "the club's own app" with a good experience. Greenside's branded app (own name, logo and colours, code login without passwords) aims straight at this.
- **A switching window is open now, and closing.** E-Golf4U is being retired and every E-Golf4U club has to choose. About half had moved to Nexxchange by November 2025; others chose IntoGolf or the Golfspot stack. The clubs still on E-Golf4U, and clubs unhappy after a hurried migration, are the most reachable buyers. Greenside already imports CSV from E-Golf4U, Nexxchange and IntoGolf.
- **Not every club wants to replace everything.** The Golfspot stack is explicitly "best-of-breed" with a data platform that syncs "your member app" (golfspot.io). That suggests a second route: Greenside as the member app on top of an existing administration, instead of (or before) replacing it.
- **Unverified:** whether competitors also sell extras, bar tab on account and guest fees in their apps. No source confirms or denies it; check in demos before claiming it as a difference.

6. The threat

1. **GOLF.NL (NGF):** free, national, already booking tee times with **payment** and expanding ("Zoek en boek"; July 2026). It owns the golfer's NGF card and handicap. If the NGF adds club news or a member account, the reason for a club app shrinks. Greenside should sit *next to* it (club account, extras, club life), not compete on booking.
2. **IntoGolf:** the only one with native branded club apps already. Fixing its app quality would close Greenside's clearest gap fastest.
3. **Golfspot/TeeControl/Parrow:** modern, Dutch, growing among well-known clubs (Bernardus, Kennemer). Adding a native member app to Golfdashboard would be a short step.
4. **Nexxchange:** large, acquisitive (E-Golf4U, Sysgolf ([source](#)), UGOLF partnership) and inheriting many Dutch clubs.

Open questions for the next skills

- What do clubs pay today, per year, for their system? (ask in every sales call; `/founder-pricing`)
- Will members install a club app next to GOLF.NL? (`/founder-consumer`)
- Replace the administration, or be the member app on top of it? (`/founder-offer`, `/founder-cfo`)

The buyer panel

0 buy · 20 pass (0% buy) out of 20 simulated buyers. Seed 682799, so the same cards can be dealt again.

These are simulated buyers, not customers. Use this to find objections and weak spots, then confirm the big ones with real people before you spend.

By segment

group	buyers	buy rate
Board member or paid club manager of an 18-hole club (±950 members, turnover around 1.8 million euro)	11	0%
Club manager or commercial manager of a 27+ hole club or a commercially run course (±1,350 members)	4	0% (thin)
Volunteer board member of a 9-hole club (±550 members, mostly volunteers)	5	0% (thin)

By buying behaviour

group	buyers	buy rate
Still on E-Golf4U, must choose a new system now	4	0% (thin)
Just migrated, tired of switching	3	0% (thin)
Loyal to the current vendor	3	0% (thin)
Treasurer, every euro counts	3	0% (thin)
Overloaded secretary / volunteer	3	0% (thin)
Commercially minded manager	2	0% (thin)
Cautious chair, goes through the members' meeting	2	0% (thin)

By income

group	buyers	buy rate
\$62,000 to \$79,000	8	0%
\$79,000 and up	7	0% (thin)
under \$62,000	5	0% (thin)

Why they pass

reason	buyers	in their words
trust	15	"We have 950 members, most over 60, and E-Golf4U is going away, so this migration has to work the first time. I can't take a two-founder product with zero live clubs to my board when Nexxchange and IntoGolf run hundreds of clubs already." (P001) · "We have run our current system for years and it works well enough; I'm not moving 950 members, our tee sheet and our invoicing to two founders whose first pilot club isn't even live yet. A nice app in our own colours doesn't outweigh the risk of a messy season." (P003)
timing	3	"We just dragged 950 members and a worn-out volunteer team through a migration off E-Golf4U; I'm not putting them through another one within a year for a product whose first pilot club isn't even live yet." (P002) · "We just finished moving off E-Golf4U, the volunteers are exhausted and the members have only just learned the new system. I'm not putting the club through another migration within a year, least of all onto something that isn't even live at its first pilot club." (P004)

reason	buyers	in their words
habit	2	"We've run on our current system for years, it works well enough and the vendor knows us. Switching 550 members to a new app from two founders whose first club isn't even live yet is a headache our volunteer board doesn't need for €249 a month." (P008) · "We've run on our current system for years, the vendor knows us and it works well enough. Switching means migrating 550 members, retraining volunteers and getting a lot of people over 60 to install yet another app, and that's a lot of grief for a small volunteer board to take on for software that isn't live anywhere yet, built by two founders." (P017)

Why they buy

reason	buyers	in their words
--------	--------	----------------

What would flip a no

- Seeing Golfclub Zwolle or another 18-hole club actually live for a full season, with a manager I can call, plus a written guarantee that we can export all our data if Greenside stops.
- A comparable 18-hole club running it live for a full season with a working NGF/handicap link and direct debit, and a contract that lets us exit after the pilot with our data exported at no cost.
- Seeing a comparable 18-hole club running it live for a full season without problems, and a clear way to get our data out if they go under.
- A few clubs our size running on it for a full season without trouble, plus a contractual escrow or full data-export guarantee if they stop, and then talk to me again when our current contract comes up for renewal.
- Seeing Golfclub Zwolle actually live for a full season, with their treasurer telling me invoicing and iDEAL work and that it replaced their old package instead of adding to it.
- Two or three comparable clubs running it live for a full season, that I can phone and visit, plus a contract that guarantees our data and support if the company stops.
- Seeing Golfclub Zwolle live for a full season, plus a call with their secretary about how the older members and the migration went, and an escrow or data-export guarantee in the contract.
- Seeing a comparable 9-hole volunteer club running on it for a full season without trouble, and our current vendor raising prices or dropping support.
- Our current system failing badly in the next year or two, plus seeing Golfclub Zwolle running live for a full season with older members actually using the app, and you doing the whole migration for free.
- Golfclub Zwolle running live for a full season with a treasurer I can call, plus a pilot we can walk away from at no cost and a written guarantee we get our data back if they stop.
- Seeing it live at a club our size for a full season, with the NGF handicap link and direct debit working, and a reference call with their manager before the spring budget meeting.
- A comparable 18-hole club that has run a full season on it live, plus a written guarantee that we get a full export of all our data and a transition period if they stop.

20 buyers gave all four price answers. Run founder-pricing's van_westendorp.py on the answers folder.

Pricing

Amounts in euros per month, excl. 21% VAT. Buyer answers are simulated (`founder/pricing-curve.md`): they pick what to test, they are not proof. Margins come from `unit_economics.py` on `founder/numbers.json` (founders unpaid) and `founder/numbers-met-salaris.json` ($2 \times \text{€ } 2,500$).

1. The price

	9 holes	18 holes	27+ holes
List price	€ 199 (was € 249)	€ 449 (same)	€ 599 (same)
Founding price (first ten clubs, fixed two years)	€ 179 (same)	€ 399 (same)	€ 499 (was € 399)
Buyers' acceptable range	€ 75 – 251	€ 151 – 600	€ 152 – 752
Buyers' "bargain = expensive" point (IPP)	€ 151	€ 300	€ 352

Why:

- **9 holes: list € 249 → € 199.** € 249 sat right on the edge of what volunteer boards accept (PME € 251); their median "getting expensive" is € 220. € 199 is inside the range, and the step to the € 179 founding price stays real. 9-hole clubs are 25% of the market, so this costs little: blended list price € 429 → € 416.50.
- **18 holes: unchanged.** € 449 and € 399 are well inside the range; 3 of 22 answers say outright that price is "not the problem" or "small money". The doubt is trust, not price.
- **27+ holes founding € 399 → € 499.** € 399 for a 1,350-member club was a 33% discount, more than needed: € 499 is still below their "getting expensive" median of € 650. It adds € 20 to the blended founding price (€ 344 → € 364).
- **Drop "two months free when paying a year up front".** That is a 17% discount clubs did not ask for. Clubs budget per year anyway: invoice yearly in advance at the normal price, or monthly.
- **Keep the migration fee for clubs after the first ten** (€ 750 for 9 holes, € 1,500 for 18+): it pays for the work in "We do the work". Founding clubs pay none.

Against competitors. No one publishes Dutch prices, except one data point: Nexxchange GolfSuite lists **€ 200 a month plus € 50 per simultaneous user**, plus a one-off installation fee ([Capterra](#), [GetApp](#), [G2](#); aggregator sites, confirm with a quote). An 18-hole club with 3–5 people at the desk, secretariat and finance would pay about **€ 350–450** (estimate). So € 449 is the price of a *whole* club system. That is the sales line, and also the risk:

- If Greenside **replaces** the current system, € 449 is roughly the same bill with a club app on top. That is the answer to "it comes on top of what we pay" (7 of 20 answers).
- If it runs **next to** the current system, it doubles the software bill, and treasurers say no. Without the NGF handicap link and direct debit, many clubs cannot fully replace it (`founder/offer.md`, K).

The margin (tool output, per club-month; costs as updated by `/founder-ops`):

price	contribution	break-even, unpaid	break-even, $2 \times \text{€ } 2,500$
Founding mix € 364	€ 318.50 (88%)	2 clubs	17 clubs
List mix € 416.50	€ 371 (89%)	2 clubs	15 clubs
Old list mix € 429	€ 383.50 (89%)	2 clubs	15 clubs

Only ten clubs get the founding price, so the real path is **10 founding clubs + 6 at list price = 16 clubs** to pay both founders € 2,500 ($5,398 - 10 \times 318.50 = 2,213; + 371 = 6.0 \rightarrow 6$). That is 6% of the 263 NGF clubs, and below the 25 clubs two people can serve.

2. The ladder

Clubs don't choose a size; they have one. So the ladder is not "good / better / best" but:

1. **By course size** (9 / 18 / 27+), above. The step up follows the number of members and desk staff, which is what clubs already expect from Nexxchange's per-user pricing.
2. **Add-ons later, only when built and wanted:** NGF handicap link, direct debit, a link to the bar's cash register (unTill), the ball machine (Xafax). Each one is a reason the club can drop another system, so price them per add-on, not in the base. Do not sell them before they exist.

3. The opening offer

Greenside Founding Club: the first ten clubs pay the founding price, fixed for two years, no migration fee, and get the free three-month pilot with written success criteria.

- **End date:** the founding price applies to clubs whose pilot starts **before 1 July 2027**, or until ten clubs have signed, whichever comes first. Pick the date yourselves, but put a real one in writing and keep it.
- **After two years** the club moves to the list price at that time. Write this in the contract, so the founding price is a real, dated deal and not a "was" price.
- The list prices above are what club 11 onward actually pays, so the comparison is honest.

4. What to test with real buyers

Simulated answers are not enough. Test with real club boards, starting with Zwolle's contacts and the E-Golf4U clubs that have to switch anyway:

1. **18 holes: € 399 vs. € 449 founding price.** Half the board conversations get one price sheet, half the other (alternate, don't choose). Measure: how many ask for a pilot or sign a letter of intent. If € 449 converts as well, the founding discount is not needed.
2. **9 holes: € 149 vs. € 179 founding price,** same method. € 149 sits at their "bargain = expensive" point (€ 151); test whether it opens the volunteer clubs.
3. Ask every board **what they pay their current vendor today** (licence, per user, add-ons). That is the number that decides "replace, not add", and nobody publishes it.

5. The panel's price objections (verbatim, for marketing)

1. **"It comes on top of what we already pay."** "A free pilot sounds harmless, but after it we would be paying close to 5,000 euros a year on top of our current vendor, and that has to go through the next budget round with a clear return." (P005, 18 holes, v2)
2. **"We'll pay twice if it doesn't replace our system."** "Does it work with the NGF handicap system and our direct debit? If not, we'd run two systems and pay twice." (P013, 9 holes, v1)
3. **"Small clubs have to defend every euro, and GOLF.NL is free."** "At roughly 3,000 euros a year this has to go to the members' meeting, where half the room will say GOLF.NL is free and already does tee times." (P014, 9 holes, v2)

These are simulated buyers' words: use them to write answers, never as quotes from customers.

The offer

Method: the Offers lens (`.claude/skills/founder-board/lenses.md`), a summary of a published framework, applied to what the board, the competitor map and the buyer panel found. No CFO numbers exist yet (`founder/numbers.json` is missing), so every cost score below is an **estimate** and every money promise is marked for `/founder-cfo`.

1. The problem list (in the buyer's words)

Sources: panel v1 (`founder/panel/results.md`, 20 of 20 passed), board (`founder/board.md`), competitors (`founder/competitors.md`).

Before buying

1. "No club is live yet, not even Zwolle: where are the references?" (panel, 15 × trust)
2. "Two founders: what happens to our members, invoices and tee sheet if they stop?" (panel, almost all)
3. "I can't take an unproven vendor to the members' meeting (ALV)." (panel)
4. "We just migrated off E-Golf4U; the volunteers can't take another switch." (panel, 3 × timing)
5. "Our current system works well enough and the vendor knows us." (panel, 2 × habit)
6. "Will we pay twice: the old system and Greenside side by side?" (panel)
7. "€ 249 a month is a lot for a 9-hole volunteer club." (panel price answers: 9 holes find € 225 expensive)
8. "Plus a migration fee of € 750–1,500 on top." (panel)
9. "Does it work with the NGF handicap and our direct debit?" (panel)
10. "GOLF.NL is free and already books tee times and takes payment." (panel, competitors)
11. "Nothing in the offer says it brings in more revenue." (panel P012, P020)
12. "The budget for next year is decided at the spring meeting." (panel)

During the switch 13. "Migrating 550–1,350 members, our invoices and tee sheet is a project, not less work." (panel) 14. "Members over 60 won't install a new app or log in with e-mail codes." (panel) 15. "If half the members phone the secretary to book, we're worse off." (panel P017) 16. "Who helps a member when a login code doesn't arrive on Saturday morning?" (board) 17. "A failed import or iDEAL problem puts the whole membership at my desk." (panel P020) 18. "Members lose their friend groups for booking" (competitor complaint, De Kroonprins).

After 19. "Does it last, or is this a hobby project?" (panel, board) 20. "Can we leave, with our data, without a penalty?" (panel) 21. "How do we know it pays for itself?" (board: value is an unmeasured estimate) 22. "What do we tell the members' meeting after a year?" (panel)

2. Solutions, scored

Value to the buyer 1–5 (from how often the panel raised it). Cost to deliver 1–5 (estimate, mostly founder time; to be priced by `/founder-cfo`).

#	Solution	Answers	Value	Cost	Keep?
A	Pilot next to the current system: 3 months for the board and a group of members; nothing is cancelled until it works	4, 6, 13, 3	5		2 ✓ core
B	Success agreed in writing before the pilot (e.g. 40% of members active); not reached = walk away	1, 21, 22, 3	5		1 ✓ guarantee
C	Stop after the pilot and pay nothing (no licence, no migration fee)	1, 8, 20	5	3 (unpaid founder time if a club stops)	✓ guarantee
D	Data guarantee in the contract: export of all members, invoices, bookings at any time; 12 months' notice and full handover if Greenside stops	2, 19, 20	5	2 (full export still to build)	✓ bonus
E	We do the migration and member launch: import, invitations, printed guide for older members	13, 14, 17	4		2 ✓ bonus

#	Solution	Answers	Value	Cost	Keep?
F	Helpline in the first four weeks, Saturday mornings included	15, 16, 17	4	3 (founder time on weekends)	✓ bonus
G	Reference call with Zwolle's board before deciding, once Zwolle is live	1, 3	5	1	✓ (true only after Zwolle is live)
H	9-hole founding price € 179 (was € 249)	7	4	2 (lower revenue)	✓ test; / founder-pricing decides
I	No migration fee for founding clubs	8	3	2	✓
J	Source-code escrow with a third party	2, 19	4	4 (yearly fee, unknown)	✗ for now: D covers most of it; revisit with CFO
K	NGF handicap link and direct debit in the product	9	4	5 (not built; direct debit removed from the pilot)	✗ not promised; product decision
L	Revenue guarantee ("earns back the licence or we refund")	11, 21	4	4 (claim rate unknown)	✗ until CFO models it; B is the safe version
M	Run as member app only on top of the old system	6, 13	4	5 (needs integrations)	✗ not deliverable now

Must exist before the first sale: full data export (members exists; invoices and bookings still to build), a contract with clauses B, C and D, the printed member guide, and a helpline arrangement.

3. The stack

- **Name:** *Greenside Founding Club*
- **The core:** your club's own app in the stores, run from one place, tried for three months next to your current system before anything changes (A).
- **The guarantee:** success criteria agreed in writing before the pilot; miss them, or simply want to stop, and you pay nothing (B + C).
- **Bonuses:**
 1. *Your data stays yours:* export anytime; 12 months' notice and full handover if Greenside stops (D). Kills objection 2.
 2. *We do the work:* import, invitations, a printed guide for older members (E). Kills 13 and 14.
 3. *Saturday-morning helpline* for the first four weeks (F). Kills 15–17.
- **Urgency and scarcity (real):** ten founding clubs at € 179 (9 holes) or € 399 (18+), fixed for two years, no migration fee (H, I). The other real urgency is external: E-Golf4U is being retired, so many clubs must choose now.
- **Proof:** a call with Zwolle's board once Zwolle is live (G). Not before; the pitch says so.

4. Value equation (1–10, before → after)

	Before (pitch v1)	After (Founding Club)	What moves it
Dream outcome	5	6	Success defined with the club; still no revenue proof
Perceived likelihood	2	4	Written success criteria, data guarantee, Zwolle reference <i>later</i> . Stays low until Zwolle is live
Time to result	4	5	Pilot next to the old system, no big-bang switch
Effort and sacrifice (lower = better, scored as relief)	3	6	We do the migration, printed guide, helpline, stop for free

The weakest score stays **likelihood**: no offer replaces a live reference club.

5. Re-test

Same 20 simulated decision-makers (seed 682799), new pitch (`founder/pitch.md` ; the old one is `founder/pitch-v1.md`). Results in `founder/panel-v2/` .

Result: 0 buy · 20 pass, before and after. The new offer did not move the buy rate. Language models lean agreeable, so a 0 here is a strong signal, not noise.

	Pitch v1	Founding Club (v2)
Buy	0 / 20	0 / 20
Reason: trust	15	11
Reason: timing	3	6
Reason: habit	2	3

What moved (counted across the 20 answers)

- **Data and continuity fear dropped:** export or escrow demanded in 10 answers before, 3 after. Bonus D works on paper; buyers now call it "paper safeguards" but stop asking for it.
- **Trust became timing:** four buyers moved from "I don't trust it" to "not now / next budget round / next contract renewal". The offer made Greenside plausible later, not now.
- **Zwolle is the whole case:** 10 answers named Zwolle before, **19 of 20** after. Almost every "what would change my mind" is: *Zwolle live for a season, its board on the phone, older members actually using it.*

What did not move, or got worse

- **Double work during the pilot:** 2 answers before, 9 after. "Pilot next to the current system" reads as two systems and extra volunteer work, not as safety.
- **Cost on top of the current vendor:** 7 both times. Treasurers want to see that Greenside *replaces* a bill, not adds one.
- **NGF handicap and direct debit:** still named as a must (5 and 3 answers). Not promised (K).
- **Two founders:** still in almost every answer; no offer element can fix it.
- **9-hole price:** median "getting expensive" fell from € 225 to € 200, "too expensive" € 300; the € 179 founding price sits just under it. 18 holes: € 399 is inside the range (median bargain € 250, expensive € 550). 27+ holes: unchanged (expensive € 650).

Conclusion: the problem is not the offer but **proof**. No stack replaces a live reference club. What to change:

1. Get Zwolle live and measured first (the board's condition); every other sale waits on it.
2. Reword the pilot as "we run it, your volunteers don't" and show which current costs it replaces (a side-by-side of the club's software bill), instead of "next to your system".
3. Decide on NGF handicap and direct debit (product), because they block "replace".
4. Price questions go to `/founder-pricing`; the guarantee and support cost to `/founder-cfo`.

These are simulated buyers: use the objections, not the numbers, and confirm with real club boards.

The numbers

Read this first. The tool prints € and "a day"; here every amount is in **euros, excl. 21% VAT**, and "at once" means **clubs paying at the same time**. One unit = one paying club for one month. Inputs: `founder/numbers.json` (founders unpaid, today's reality) and `founder/numbers-met-salaris.json` (same, plus € 2,500 a month for each founder, the founders' target). Prices from `founder/pricing.md`; costs checked by `/founder-ops` (`founder/ops.md`). Sources and estimates: `founder/cfo-sources.md`. Not financial, tax or legal advice: have an accountant check the structure, payroll costs and VAT before money moves.

The CFO's note

The margin. Each paying club leaves **€ 318.50 a month** (88%) at the blended founding price of € 364 (€ 179 / € 399 / € 499 by course size), after onboarding, the free pilot and the walk-away guarantee (€ 35) and hosting (€ 10). The club pays its own Apple developer account (Apple requires the app under the club's name). Running costs without pay are **€ 398 a month**, so **2 paying clubs cover them**. The software is cheap to run; that is not the problem.

The line to watch: founder pay. € 2,500 each makes fixed costs € 5,398 a month. Break-even becomes **17 clubs at the founding price, 15 at list price**. Only ten clubs get the founding price, so the real number is **10 founding + 6 list = 16 clubs** (6% of the 263 NGF clubs, and within the ~25 two people can serve). Every other what-if moves year 1 by a few hundred euros; pay moves it by € 60,000.

The ramp is the second line. Year 1 assumes Zwolle runs a free pilot in months 1–3 and pays from month 4, and that the next clubs only sign after Zwolle has proof (month 11: 2, month 12: 3). The panel backs this: 0 of 20 buy now and 19 of 20 wait for Zwolle. At that ramp year 1 brings in **€ 4,368**. Even a faster ramp (5 clubs by month 12) only gives € 7,280.

Cash.

- Founders unpaid: you need **€ 12,174** before it pays for itself, mostly the start-up spend of € 10,423 (security test € 7,500, lawyer € 2,500). Year 1 operating result: **€ -954**.
- Founders paid € 2,500 each from month 1: you need **€ 71,377** in year 1, and at 3 clubs you still lose about € 4,400 a month.
- The middle way: **pay grows with the clubs**. Everything above € 398 a month goes to the founders. At 3 clubs that is about € 560 a month for the two of you; the full € 2,500 each comes at ~16 clubs. On this ramp that is year 2 to 3, and it needs savings, part-time work or outside money to bridge.

Three ways to improve the margin (what-ifs; unpaid / paid € 2,500 each):

1. **Zwolle pays from month 1** instead of after a free pilot (it is the reference club, not a prospect): year 1 € -954 → **€ +2**.
2. **Expo Starter (USD 19) instead of Production (USD 99) while there are few apps**: fixed costs -€ 72; year 1 € -954 → **€ -90**.
3. **List price for every club after the first ten** (€ 416.50 blended): break-even with pay 17 → **15 clubs**; year 1 € -954 → **€ -324** if it applied from the start. Fewer free pilots that walk away (1 in 10 instead of 1 in 3) matters less now that onboarding is cheaper: year 1 € -954 → **€ -846**.

The board's money conditions (`founder/board.md`):

- *Cost to win one club, cost to run one club, clubs to break even: answered, as estimates.* Winning a club costs about € 560 cash (printed guide ~€ 300, travel ~€ 200, three months' free running) plus ~40 founder hours; with 1 in 3 pilots walking away that is ~€ 830 per paying club. Running one costs ~€ 11 a month in cash. Break-even: 2 clubs unpaid, 16 with € 2,500 each.
- *A guarantee the business can afford: met for the walk-away guarantee* (priced into the € 35). The revenue guarantee (Lin `founder/offer.md`) stays off: no data on claim rates.
- *At least 3 founding clubs signed before building further: not met*; on this ramp that is month 12 at the earliest.

Verdict. Every club is profitable and running costs are tiny, but **€ 2,500 each needs ~16 clubs**, and clubs wait for Zwolle first. Plan for 1.5 to 3 years before full pay, and decide now how to bridge it (savings, part-time, a loan or outside money after Zwolle's season).

Scenario A: founders unpaid (today)

One club-month

line	per club-month
Price	€ 364.00
Onboarding, free pilot and walk-away guarantee, spread over the 24-month founding term (estimate, updated by /founder-ops: printed guide ~EUR 300)	€ -35.00
Hosting share per club: database growth, e-mail above the bundle, app builds (estimate)	€ -10.00
Apple developer account: EUR 0 for Greenside, the club enrolls itself (Apple guideline 4.2.6; see ops.md)	€ -0.00
Collecting the licence by SEPA direct debit (estimate)	€ -0.50
Contribution (what each club-month leaves to pay the fixed costs)	€ 318.50 (88%)

The margin that matters

Fixed costs: € 398 a month (Founder pay (none today: founders unpaid; see the second scenario) € 0, Expo EAS Production, USD 99 (public price) € 89, Supabase Pro + Small compute + staging project, ~USD 40 (public price) € 36, Vercel Pro, 1 seat, USD 20 (public price) € 18, Resend Pro, 50,000 e-mails, USD 20 (public price) € 18, Accountant and bookkeeping (estimate) € 100, Liability (BAV, ~EUR 61 indication) and cyber insurance (estimate) € 100, E-mail accounts for 2 founders (estimate) € 14, Helpline phone number (estimate) € 15, Greenside's own Apple developer account, EUR 99 a year (public price) € 8).

- **Break-even: 2 club-months at once.** Below that you lose money every month.
- **Profit margin at your plan** (10 at once): **77%** of every sale, after every cost.
- Capacity: 25 at once.

Year 1, month by month

month	club-months at once	revenue	profit	cumulative (after € 10,423 startup)
1	0	€ 0	€ -398	€ -10,821
2	0	€ 0	€ -398	€ -11,219
3	0	€ 0	€ -398	€ -11,617
4	1	€ 364	€ -80	€ -11,696
5	1	€ 364	€ -80	€ -11,776
6	1	€ 364	€ -80	€ -11,856
7	1	€ 364	€ -80	€ -11,935
8	1	€ 364	€ -80	€ -12,014
9	1	€ 364	€ -80	€ -12,094
10	1	€ 364	€ -80	€ -12,174
11	2	€ 728	€ 239	€ -11,934
12	3	€ 1,092	€ 558	€ -11,377

- **Year 1 operating profit: € -954** on € 4,368 of revenue.
- After the € 10,423 startup spend: € -11,377.

- Startup money earned back: not within year 1.
- Cash you need before it pays for itself: **€ 12,174.**

What if

scenario	margin at plan	break-even at once	year 1 profit
Base plan	77%	2	€ -954
Price -10%	74%	2	€ -1,391
Volume -20%	74%	2	€ -1,718
Unit costs +15%	75%	2	€ -1,036

Red flags

- Year 1 loses money on operations (€ -954).
- The startup spend is not earned back within year 1.

Scenario B: founders paid € 2,500 a month each

One club-month

line	per club-month
Price	€ 364.00
Onboarding, free pilot and walk-away guarantee, spread over the 24-month founding term (estimate, updated by / founder-ops: printed guide ~EUR 300)	€ -35.00
Hosting share per club: database growth, e-mail above the bundle, app builds (estimate)	€ -10.00
Apple developer account: EUR 0 for Greenside, the club enrolls itself (Apple guideline 4.2.6; see ops.md)	€ -0.00
Collecting the licence by SEPA direct debit (estimate)	€ -0.50
Contribution (what each club-month leaves to pay the fixed costs)	€ 318.50 (88%)

The margin that matters

Fixed costs: € 5,398 a month (Founder pay: 2 founders x EUR 2,500 a month (the founders' target; what it costs the company depends on the legal form, check with an accountant) € 5,000, Expo EAS Production, USD 99 (public price) € 89, Supabase Pro + Small compute + staging project, ~USD 40 (public price) € 36, Vercel Pro, 1 seat, USD 20 (public price) € 18, Resend Pro, 50,000 e-mails, USD 20 (public price) € 18, Accountant and bookkeeping (estimate) € 100, Liability (BAV, ~EUR 61 indication) and cyber insurance (estimate) € 100, E-mail accounts for 2 founders (estimate) € 14, Helpline phone number (estimate) € 15, Greenside's own Apple developer account, EUR 99 a year (public price) € 8).

- **Break-even: 17 club-months at once.** Below that you lose money every month.
- **Profit margin at your plan** (10 at once): **-61%** of every sale, after every cost.
- Capacity: 25 at once.

Year 1, month by month

month	club-months at once	revenue	profit	cumulative (after € 10,423 startup)
1	0	€ 0	€ -5,398	€ -15,821
2	0	€ 0	€ -5,398	€ -21,219

- After the € 10,423 startup spend: € -71,377.
- Startup money earned back: not within year 1.
- Cash you need before it pays for itself: **€ 71,377**.

What if

scenario	margin at plan	break-even at once	year1 profit
Base plan	-61%	17	€ -60,954
Price -10%	-79%	20	€ -61,391
Volume -20%	-98%	17	€ -61,718
Unit costs +15%	-63%	18	€ -61,036

Red flags

- Year 1 loses money on operations (€ -60,954).
- The startup spend is not earned back within year 1.

Marketing

Evidence used: `founder/panel/results.md` and `founder/panel-v2/results.md` (simulated buyers), `founder/competitors.md`, `founder/offer.md`, `founder/pricing.md`, `founder/numbers.json`. Panel quotes below are **research**, never customer quotes: they do not go in ads.

0. What the evidence says first

- **No segment buys yet: 0 of 20, twice.** There is no "segment with the highest buy rate". The closest thing is the group whose *timing* is right: clubs **still on E-Golf4U that must choose a new system now** (4 of 20). One of them: "the timing is right and the price is not the problem. But I am not putting 950 members ... on a two-person company whose first pilot club is not even live yet" (P018).
- **19 of 20 say what would change their mind: Zwolle live, and a call with its board.** So marketing before Zwolle is live can only open doors and book conversations. It cannot close. The campaign below starts when Zwolle's members get the app.
- **The audience is small and known:** 263 NGF clubs, each with a board of 5–7 people and often a club manager. This is account-by-account selling, not mass marketing. Every club has a name, an address and a members' meeting date.
- **What the marketing must answer** (most named objections, v2):
 1. two founders, no live club (almost every answer) → *proof: Zwolle, data guarantee, contract*
 2. double work during the pilot (9 of 20) → *"we do the work"*
 3. it comes on top of what we pay (7 of 20) → *"replaces, not adds"*
 4. older members won't use an app (several) → *printed guide, Saturday helpline, Zwolle's numbers*
 5. NGF handicap and direct debit (5 and 3) → *answer honestly: not yet; say what it does instead*

1. Positioning

Three versions:

A. The E-Golf4U switch (recommended)

For club boards that must leave E-Golf4U and "have to pick something the board can defend for years", Greenside is the club system with your own app in the App Store that we move you onto ourselves, for about what a club system costs today, unlike the web portals most clubs get.

Why: these clubs have to buy *something* now, so the question is not "why switch" but "why you". The gap in `competitors.md` is exactly this: most Dutch members get a web app with home-screen instructions; the one native branded app (IkGaGolven) rates 1.9. Supported by P001, P007, P018, P019 (all "must choose now"; all pass on trust, none on price).

B. Volunteers first

For volunteer boards of 9-hole clubs, who "can't take another round of explaining", Greenside is the club software where we do the import, the invitations and the Saturday helpline, unlike a system you have to roll out yourselves.

Supported by the 9 "double work" answers and the 9-hole volunteers (P008, P009, P013, P014, P017). But 9-hole clubs bring the least money (€ 179–199) and are the most tired of switching (timing).

C. Earns money for the club

For commercially run clubs, Greenside is the member app that sells guest rounds, buggies and extras with no

commission, unlike GOLF.NL, which books but isn't yours.

Supported by P012 and P020 ("nothing here earns me more per member"). But there is **no proof of revenue** yet: don't lead with it until Zwolle's numbers exist.

Pick A. Use B's promise ("we do the work") as its main proof point, and keep C for after Zwolle has a season of numbers.

2. Channels

channel	why it fits these buyers	rough cost (estimate)	how you know it worked
1. Direct, named outreach (letter + e-mail + phone call to the chair or club manager, then a visit)	263 clubs, decisions by a board; boards read post and take calls. Start with clubs still on E-Golf4U (findable: many publish E-Golf4U web-app instructions, e.g. Semslanden, Holthuizen, Havelte, Ter Specke) and clubs within ~1 hour of Zwolle	€ 1,000 for 3 months (printing, post, travel)	conversations booked per week; pilots requested
2. The Zwolle reference (a club visit, a short case with measured numbers, a call with its board)	the one thing 19 of 20 ask for	€ 300 (coffee, a printed one-pager) + Zwolle's goodwill	prospects who call Zwolle; Zwolle's board still willing after month 3
3. LinkedIn, founders' own profiles (no ads at first)	club managers, treasurers and board members are there; good for "behind the scenes" and proof posts	€ 0 (time); optional € 300 to boost 2-3 proof posts at club managers in NL	replies and connection requests from club people; meetings from LinkedIn
<i>Check, then maybe: NVG</i> (the trade association of golf courses, ~138 members in 2019) and regional club-manager meetings	where paid club managers meet	unknown: ask NVG for membership and event costs	a speaking slot or table at one event

Not doing now, and why

- **Paid search and paid social:** almost nobody searches "golfclub software" in a month; the 263 buyers are reachable by name, so ads waste money.
- **Consumer marketing to golfers** (Instagram, TikTok, influencers): golfers don't buy; boards do.
- **A booth at a trade fair:** expensive, and without a live club there is nothing to show.
- **Leading with revenue claims** ("earns back the licence"): no data yet; an earnings claim without proof is misleading advertising.
- **Naming or rating competitors in ads** ("unlike IntoGolf's 1.9"): comparative advertising must be accurate and fair; keep it for one-to-one conversations, with the source, and only facts.

3. The 30-day campaign

Launch day L = the day Zwolle's members get the app. No date is fixed yet; the calendar below assumes **Monday 1 March 2027** (start of the season, and boards prepare the spring members' meeting). Move all dates if L moves. **Ask Zwolle's board in writing** before using their name, logo or numbers anywhere: they are a real club, not a prop.

The offer throughout: **Greenside Founding Club** (founder/pricing.md): ten clubs, founding price € 179 / € 399 / € 499 fixed for two years, no migration fee, free three-month pilot with written success criteria; **for pilots starting before 1 July 2027**. Say "ten places" only while it's true, and publish how many are left only as an exact number.

date	channel	what goes out	message
Mon 15 Feb (L-14)	—	Build the list: 40 clubs (all reachable E-Golf4U clubs + 9/18-hole clubs within an hour of Zwolle). Name, chair, club manager, system, members' meeting date	—
Tue 16 Feb	—	Write the letter and the one-pager (offer, contract clauses, "we do the work")	hook 1

date	channel	what goes out	message
Wed 17 Feb	LinkedIn	Post: why we build an app in the club's own name (behind the scenes, screenshots of the Greenside base, not Zwolle)	hook 6
Thu 18 Feb	Zwolle	Agree with Zwolle's board: reference calls allowed? which numbers can be shared after 4 and 12 weeks?	—
Fri 19 Feb	—	Print the member guide; prepare the Saturday helpline	—
Mon 22 Feb (L-7)	Post	Letters to the first 20 clubs: "Your E-Golf4U switch, done for you" + one-pager	hook 1
Tue 23 Feb	LinkedIn	Post: the contract clauses in plain words (export anytime, 12 months' notice)	hook 3
Wed 24 Feb	E-mail	Same letter as e-mail to the same 20, addressed to the chair or manager by name	hook 1
Thu 25 Feb	LinkedIn	Post: "what a member over 70 sees": the printed guide, page by page	hook 5
Fri 26 Feb	—	Zwolle: invitations ready, helpline staffed	—
Mon 1 Mar (L)	Zwolle	Zwolle's members get the app. No outward campaign today: all hands on Zwolle	—
Tue 2 Mar	LinkedIn	Post: launch day, what we did (import, invitations, helpline), no numbers yet	hook 7
Wed 3 Mar	Phone	Call the 20 clubs that got the letter: "May I show you in 20 minutes?"	hook 2
Thu 4 Mar	Phone	Calls continued; book visits	hook 4
Fri 5 Mar	Post	Letters to the next 20 clubs	hook 1
Sat 6 Mar	Zwolle	Saturday helpline; note every question (content for later)	—
Mon 8 Mar (L+7)	LinkedIn	Post: week 1 at Zwolle, <i>only</i> numbers Zwolle approved (e.g. members invited, members active)	hook 8
Tue 9 Mar	Visit	First club visits: 20-minute demo on the club's own data (a CSV export they send)	hook 2
Wed 10 Mar	E-mail	Next 20 clubs by e-mail	hook 1
Thu 11 Mar	Phone	Calls to the second 20	hook 9
Fri 12 Mar	LinkedIn	Post: the five questions members asked most in week 1, and our answers	hook 5
Sat 13 Mar	Zwolle	Saturday helpline	—
Mon 15 Mar (L+14)	LinkedIn	Post: "we do the work": what the volunteers at Zwolle did <i>not</i> have to do	hook 2
Tue 16 Mar	Visit	Club visits; offer a call with Zwolle's board (only if Zwolle agreed)	hook 10
Wed 17 Mar (L+16)	—	Review: conversations, pilot requests, Zwolle activation. Decide what to change (section 5)	—

Ten hooks (Dutch, the market's language; each answers one objection)

1. Letter headline: **"Weg van E-Golf4U? Wij verhuizen uw club. U hoeft niets over te typen."** (switch effort)
2. Phone opener: **"Uw vrijwilligers doen niets: wij importeren, nodigen uit en nemen de telefoon op."** (double work)
3. LinkedIn headline: **"Uw ledenlijst is van u. Dat staat in ons contract, niet in een folder."** (data, two founders)
4. One-pager line: **"Stop na drie maanden, betaal niets."** (risk)
5. Post opening: **"Zo ziet een lid van 74 de app: papieren handleiding, één code per mail, klaar."** (older members)
6. Post opening: **"Uw club in de App Store, met uw eigen naam. Geen snelkoppeling op het startscherm."** (gap vs web apps)
7. Post opening: **"Vandaag kregen de leden hun eigen clubapp. Wat er vooraf gebeurde, zie je niet."** (behind the scenes)
8. Post headline (only with Zwolle's approval and real numbers): **"Week 1: [x] leden actief. Zonder één extra uur van het secretariaat."** (proof)

9. Phone opener for treasurers: **"Vervangt uw systeem, komt er niet bij. Wat betaalt u nu per maand?"** (cost on top)
10. Visit close: **"Bel het bestuur van Zwolle voordat u beslist."** (no live club) — only once Zwolle agrees.

When there is nothing new to say: a member question from the Saturday helpline and its answer; a screen of the club management ("mission control") explained in one sentence; how the import works, step by step; what the contract says, clause by clause; why there is no commission.

4. Budget

First three months, estimates (no quotes yet):

item	€
Letters and one-pagers, 60 clubs, printed and posted	300
Travel for ~15 club visits	700
Zwolle reference: printed case one-pager, coffee at a club visit	300
LinkedIn boost of 2-3 proof posts (optional, after week 2)	300
NVG: to be checked	?
Total	€ 1,600 + NVG

The most you can pay to win one club. From the CFO (`founder/numbers.json`): a founding club leaves **€ 318.50 a month**, fixed for 24 months → **€ 7,644** over the founding term, after its own running, onboarding and pilot costs. The panel's buy rate is 0%, so it cannot give a conversion rate; the cap comes from cash instead. Two rules:

- **Spend at most 3 months of contribution, about € 955 cash per club won**, so a club pays back its own acquisition in its first quarter after the pilot.
- **Never spend more than you have:** with the founders unpaid, total cash need is about € 12,200 (`founder/cfo.md`); this campaign adds € 1,600. The real cost is founder time: ~40 hours of onboarding per club, plus selling.

5. Three numbers to watch, weekly

number	target	change something when
Conversations booked (20-minute demo or visit with a board member or manager)	3 a week	below 2 a week for two weeks → rewrite the letter, switch to phone first, ask Zwolle for an intro
Zwolle members active in the app (logged in that week + members)	40% by week 12 (the success criterion in the offer)	below 20% at week 4 → stop outreach, fix adoption at Zwolle first; nothing else sells without it
Pilot requests / letters of intent	3 by L+90 (the board's "3 founding clubs" condition)	0 after 10 conversations → the offer or the timing is wrong: ask every "no" why, in their words, and go back to <code>/founder-offer</code>

Rules for everything above

- No fake reviews, testimonials, follower counts or "as seen on". No numbers about Zwolle that Zwolle did not approve.
- Panel quotes are research, never customer quotes.
- Disclose any paid partnership. Claims about savings or revenue only with real data behind them. Not legal advice.

Brand

Brief used: `founder/marketing.md` (positioning A: the E-Golf4U switch, "we do the work"), `founder/competitors.md`, `founder/offer.md`, panel v1 and v2. Copy for the market is in Dutch.

Starting point. Greenside already has a name and a look in the product: the Greenside theme (pine green, brass and chalk white, Fraunces and Manrope) in `packages/shared/src/brand.ts`, frozen as `pilot-v1`. This skill does not change those values; a test guards them. What is new here: is the name safe to keep, what does the company sound like, and the brief for the parts that don't exist yet (a logo, the letter, the website).

Who sees the Greenside brand. Not the members: they see their club's own app, name and colours. Greenside's brand is for **club boards, club managers and treasurers**, who meet it on a letter, a one-pager, a contract, LinkedIn and the club management screens. It has to say *dependable*, not *startup*. The panel's biggest doubt is "two founders, will they still be there?"; the brand must not make that worse.

1. Name

Ten candidates

#	name	style	what it says	out loud / on an icon	risk
1	Greenside (current)	evocative golf term	"next to the green": close to the game, at the club	easy in Dutch and English; "G" monogram works at 32 px	a common golf word, so weak as a trademark ; a US swing-analysis app called Greenside AI exists (below)
2	Clubhuis	descriptive, Dutch	the club's home	warm, very Dutch	generic word: can't be registered; it is also a tab name in the app
3	Vlaggestok	evocative, Dutch	the flag on the green: where every round ends	memorable, a bit long; flag icon is easy	hard for non-Dutch; flag icons are a golf cliché
4	Marker	golf term	the person who checks your scorecard: trust	short, strong	common word; many "Marker" brands
5	Golvo	invented	nothing yet, so it can mean what you make it	short, sounds like a product	means nothing to a board; needs explaining
6	Baanboek	descriptive, Dutch	the club's book: tee sheet, members, invoices	clear	generic; sounds like a paper diary
7	Ledenhuis	descriptive, Dutch	home for members	clear	generic; sounds like a housing association
8	<i>[founders' surname] & Co</i>	founder's name	people you can call: answers the "who are they?" doubt	depends on the name	ties the company to two people, which is exactly the doubt
9	Veldzicht	place-like	a view over the course, like a Dutch estate name	sounds like a golf club	many places and companies are called that; confusion with clubs
10	Teeline	invented golf blend	tee + line: the tee sheet	easy	close to "TeeControl" and "TeeQuest" (competitors): confusion

Shortlist: Greenside, Vlaggestok, Golvo

Recommendation: keep Greenside, after the checks below. The product, the code, the demo, the review account and the pilot materials already carry it; members never see it; and it sounds established, which is what boards need. Change it only if the trademark check finds a blocking mark in the EU or Benelux for software (classes 9 and 42).

What I could check (public searches only)

- **Greenside AI** ([App Store](#)): a US golf swing-analysis app for golfers (publisher Greenside AI, Inc., site [greenside.ai](#)), 4.9 stars. Same word, same sport, App Store software. Different buyer (golfers, not clubs) and different market, but it is the main confusion risk, and a reason to always say "**Greenside Clubsoftware**" or pair the name with the logo, not the bare word.
- Other uses found: a golf restaurant "Greenside" in Bad Saarow, Germany; a golf simulator venue "Greenside Golf" in Cannock, UK; a 9-hole course "Greenside Colliery" in South Africa ([1golf.eu](#)). No Dutch company or club software named Greenside turned up.
- **Competitor names** ([competitors.md](#)): IntoGolf, Nexxchange, E-Golf4U, Golfspot, TeeControl, Parrow, GolfBox, CompuGolf, Golf Genius, GOLF.NL, Golf@. None close to "Greenside".
- **Domains and handles: I could not check them.** This environment has no access to DNS or the registries. Check them yourselves (below).

Checks you must finish yourselves

I can only run public web searches. A trademark lawyer confirms, and **nothing is yours until you register it**. Not legal advice.

check	where	what to look for
Benelux trademark	BOIPregister	"Greenside" in class 9 (downloadable software, apps), class 42 (software as a service), and class 35 (member and business administration)
EU trademark	EUIPO eSearch plus and TMview (all EU offices at once)	same classes; also "Greenside AI" and figurative marks with the word
Company names	KVK	an existing Dutch "Greenside" in software
.nl domain	SIDN whois	greenside.nl ; alternatives: greensideclubs.nl , greenside-golf.nl , greenside.golf
.com	any registrar	greenside.com (likely taken; not needed for a Dutch business)
Handles	LinkedIn (company page, most important for this buyer), Instagram, YouTube (demo videos), X	"greenside" or "greensideclubs"; TikTok is not needed for this buyer

A lawyer will probably say: as a plain word "Greenside" is **weak for golf software**, because it describes a place on the course. A **word-and-logo mark** ("Greenside" with the logo) in the Benelux, classes 9 and 42, is the cheaper and safer first step. Ask about it once the logo exists.

2. Promise, tagline, voice

The **promise** (what a club can count on, every time):

Uw club krijgt een eigen app, en wij doen het werk: de overstap, de uitnodigingen en de telefoon op zaterdagochtend.

Tagline, three options

1. "Uw club. Uw app. Wij doen het werk." (recommended: promise and positioning in one line)
2. "De clubapp die van de club is."
3. "Overstappen zonder dat uw vrijwilligers het merken."

Voice: three adjectives

	do	don't
Rustig (calm)	short sentences; say what happens next and when	exclamation marks, "revolutionair", "game-changer", urgency that isn't real
Concreet	numbers, names, steps: "wij importeren uw leden uit E-Golf4U"	vague benefits: "optimaliseer uw clubbeleving"
Eerlijk	say what it doesn't do yet (NGF handicap link, direct debit) and what it does instead	promise revenue, or imply other clubs use it before they do

Address boards formally (**u**); in the member app the club's own voice applies (the app already uses short, friendly Dutch).

Before / after (pitch line from `founder/pitch.md`):

- Before: "We do the work: we import your members from E-Golf4U, Nexxchange, IntoGolf or Excel, invite them, give you a printed guide for older members and run a helpline in the first four weeks, Saturday mornings included."
- After: "**Wij doen het werk.** Wij zetten uw leden over uit E-Golf4U, Nexxchange, IntoGolf of Excel en nodigen ze uit. Leden boven de zeventig krijgen een papieren handleiding. De eerste vier weken nemen wij de telefoon op, ook op zaterdagochtend."

3. The look, as a brief

Colour (existing Greenside values, unchanged)

colour	hex	job
Dennengroen (pine 800)	#10392D	main colour: headers, buttons, dark surfaces, the logo
Messing (brass)	#B8924A	accent: the flag, a line, a highlight. Not for text on light backgrounds
Krijtwit (chalk)	#F4F5F0	paper: backgrounds, letters, one-pagers
Inkt (ink)	#12201A	body text
Messing tekst (brassText)	#86652A	accent as text on light paper
Licht messing (brassLight)	#D9BC82	accent as text on dark green

Contrast (WCAG AA needs 4.5:1 for normal text, 3:1 for large text):

text on background	ratio	verdict
ink on chalk	15.4	AA, AAA
chalk on pine 800	11.7	AA, AAA
brassText on chalk	4.9	AA
brassLight on pine 800	7.0	AA
brass on pine 800	4.4	large text and icons only (fails AA for small text)
brass on chalk	2.6	never for text ; decoration only

Type

- **Fraunces** for headings, **Manrope** for text. Both are free under the SIL Open Font License, from [Google Fonts](#) and [Google Fonts](#); use in print, web and the app is allowed. They are already in the product. In Word or Google Docs (letters, contracts), use the same fonts; if they aren't installed, fall back to Georgia for headings and Arial for text.

Logo brief

Greenside has **no logo yet**; the product shows a "G" monogram.

- **It must say:** dependable, Dutch, close to the club. Calm enough for a contract, recognisable next to a club's own logo ("met Greenside" in a footer).
- **It must work:** as a 32 px app/browser icon and LinkedIn avatar; one colour (pine on chalk, chalk on pine); in a letterhead; as a small "met Greenside" line under a club's app or guide, where it must never compete with the club's own logo.
- **Direction to try:** a "G" whose inner curve reads as the edge of a green, or a G with a small brass flag. A word mark set in Fraunces.
- **Avoid:** golf ball with a swoosh, crossed clubs, a plain flag on a circle (clichés, and close to many club logos), anything resembling the NGF or GOLF.NL logos, gradients.
- **Concepts:** I have no image-generation tool here, but I can draw 3–4 **SVG concepts** in code; those are concepts, not a finished logo. A designer finishes the one you pick, and you own the files.

The first five touchpoints

1. **The website homepage** (greenside.nl, if free). Top line: "Uw club. Uw app. Wij doen het werk." Below: three blocks (eigen app in de stores · wij verhuizen uw club · uw gegevens blijven van u), the Founding Club offer with its real end date, and "*Bel het bestuur van Golfclub Zwolle*" only once Zwolle has agreed. Chalk background, pine headings, one brass line.
2. **The letter and one-pager** (the "packaging" for this buyer). Chalk paper, logo top left, Fraunces heading, the board member's name in the salutation, signed by a founder with a mobile number. One page: what it is, what it costs, the contract clauses, "wij doen het werk".
3. **The pilot confirmation** (the "receipt"). An e-mail and a PDF: the success criteria agreed, the start and end date, who does what, the helpline number, and "u kunt na de pilot stoppen zonder te betalen".
4. **The first LinkedIn post:** a founder, a real screenshot of the Greenside base, two sentences on why a club deserves its own app. No stock photos, no claims about clubs that don't exist yet.
5. **The reply to the first complaint** (a member's login code didn't arrive on a Saturday): "Vervelend dat de code niet aankwam. Ik heb een nieuwe gestuurd en gecontroleerd dat hij is afgeleverd. Kijkt u ook even in de map 'Ongewenst'? Lukt het niet, bel mij dan op [nummer]; ik neem vandaag op." Same day, a name, a phone number: the answer to "two founders".

Rules kept

- No competitor names, logos, colours or taglines copied.
- Fonts: SIL Open Font License only. No images or icons without rights.
- Zwolle's name and logo only with Zwolle's written consent.
- Not legal advice on trademarks.

Operations

How Greenside runs from the day Zwolle goes live. Inputs: `founder/offer.md` (what was promised), `founder/numbers.json` (costs), `README.md` "Naar productie" (the technical go-live steps), `founder/marketing.md` (the sales rhythm). Amounts excl. VAT. Prices checked 8 October 2026; where only a quote will tell, it says so and it is on the open-questions list at the end.

Costs that changed (fed back to the CFO; `founder/numbers.json` updated and `founder/cfo.md` re-run):

- **Apple developer account: € 8.25 → € 0 per club-month for Greenside.** Apple's guideline 4.2.6 says apps built from a template are rejected unless the content owner submits them, so **each club enrolls itself** and pays its own € 99 a year (sources in section 2).
- **Onboarding per club: € 55 → € 35 per club-month.** A printed 8-page A5 guide costs about € 0.30 a copy at 1,000 copies, so ~€ 300 per club instead of the € 600 guess.
- **Insurance: € 75 → € 100 a month.** Professional liability alone is about € 61 a month for a software developer (Univé indication), and cyber cover comes on top.
- **Security test: € 5,000 → € 7,500 once.** Pentests of a small web app cost € 5,000–14,000.

Result: contribution € 318.50 per club-month (was € 290), fixed costs € 398 (was € 373), break-even with € 2,500 pay for each founder **16 clubs** (10 founding + 6 list; was 18).

1. The daily cycle

Greenside sells software and service, so the "day" is mostly invisible to the customer. Steps a **club sees** are marked "club", steps a **member sees** are marked "member".

when	step	who sees it
08:00	Check overnight: errors, failed e-mails (login codes, invitations), failed payments, database health	—
08:15	Support inbox and voicemail: answer every club the same morning	club
08:30	Today's onboarding work: imports, checks, invitations for clubs in their launch weeks	club, member
during the day	Sales: calls, visits, follow-ups (marketing calendar)	club
during the day	Product work on the work branch only; <code>pilot-v1</code> stays frozen	—
17:00	Release window (at most twice a week, never Friday or Saturday): tests, base check, deploy	member
17:30	Check the day: open tickets, anything promised to a club today	—
Saturday 08:00–12:00	Helpline for clubs in their first four weeks (the promise in the offer)	club, member
monthly	Invoice the licences (SEPA direct debit), bookkeeping, check backups by restoring one	club

The core service is the onboarding of a club, not the day: it runs from six weeks before go-live to four weeks after (routine 4.2). That is where most founder hours go (~40 per club).

2. Suppliers

what	supplier	public price	alternatives	terms and notes
Database, login, files, edge functions (EU, Frankfurt)	Supabase Pro	USD 25 a month incl. USD 10 compute credit; Small compute ~USD 15 (Makerkit , Jetadmin)	self-hosted Supabase on an EU server (cheaper, much more work); no drop-in alternative for the current code	monthly, card; spend cap on by default. Confirm on supabase.com/pricing

what	supplier	public price	alternatives	terms and notes
E-mail for login codes and invitations	Resend Pro	USD 20 a month, 50,000 e-mails (Resend docs)	Postmark USD 15 a month, 10,000 e-mails, overage USD 1.80 per 1,000 (Automation Atlas)	a club launch sends ~950 invitations at once; set Supabase's e-mail limit to $\geq 1,000$ an hour (README)
App builds and store submission	Expo EAS	Production USD 99 a month (expo.dev/pricing); Starter USD 19	build locally with Xcode and Android Studio (free, needs a Mac, slower)	start on Starter; move up at ~5 apps
Club management hosting	Vercel Pro	USD 20 a month, 1 seat (Vercel docs)	any Node host in the EU	security headers already in <code>next.config.ts</code>
App Store, per club	Apple Developer Program , the club's own account	USD 99 (~€99) a year; organisations need a free D-U-N-S number; non-profits can ask for a fee waiver (Apple, fee waiver)	none: Apple requires the content owner to submit template apps (guideline 4.2.6, TechCrunch , GoodBarber)	lead time 2–4 weeks (D-U-N-S, Apple's checks): start it six weeks before go-live. The club gives Greenside access as App Manager
Google Play, per club	Google Play Console , the club's own account	USD 25 once (Google)	Greenside's own account (allowed by Google, but keep it the same as Apple)	identity checks take days; start with the Apple enrolment
Members' payments (IDEAL, invoices)	Mollie , the club's own account	per transaction, paid by the club	—	not Greenside's cost; the club does Mollie's checks (KYC) before go-live
Collecting Greenside's licence	Mollie SEPA direct debit , or the bank	Mollie ~€0.25 per collection (unverified, PayRequest); ABN AMRO €0.13 + €2.10 per batch (tariffs 2026)	invoice with bank transfer	one collection a month (or a year) per club; within the €0.50 in the CFO
Printed member guide	Helloprint or Drukwerkdeal	quote online; UK reference: 8-page A5, 1,000 copies £243 (price list)	a local printer near the club	lead time ~1 week; order two weeks before invitations go out
Bookkeeping	Moneybird	from €3 a month (5 bank transactions) to €15–29 with a bank link (nieuws.nl , Moneybird)	e-Boekhouden, Jortt, Rompslomp	plus an accountant for the year-end and VAT advice
Insurance	Univé , Hiscox (via ZZZ Nederland), others	professional liability ~€61 a month for a software developer, an indication (Univé); cyber by quote (ZZZ Nederland)	an independent broker	get two quotes; ask about cover for a data breach at a club
Security test (pentest)	a Dutch pentest firm	€5,000–14,000 for an SMB web app, 5–10 days (Kolonell); beware a cheap "pentest" that is only a scan (RedFox)	three quotes	include the member app, club management, the importer, the edge functions and club separation; plus a retest
Business phone for the helpline	Voys or a mobile provider	by quote (no public price found)	a second SIM	one number that rings both founders
Lawyer (contract, AVG documents)	an IT/privacy lawyer	by quote (CFO estimate €2,500)	standard IT terms plus a privacy specialist	needed before the first club signs

3. People

Two founders, no staff. Pay: **€ 2,000–2,500 each a month** is the target (the founders' own number); until ~16 clubs pay, pay grows with revenue (`founder/cfo.md`). What that costs the company depends on the legal form: in a BV a director-shareholder must take a minimum "customary" salary, in a VOF or sole proprietorship there is no payroll and you pay income tax on the profit. **Ask an accountant before choosing**; payroll costs, pension and VAT are not in these numbers.

Roles

- **Founder A – product and safety**: releases, security, monitoring, imports, the base check, answering technical tickets.
- **Founder B – clubs and sales**: outreach, visits, the onboarding meetings, the printed guide, the helpline lead, invoicing. Both can do the morning check and the Saturday helpline, so one can be ill or on holiday.

Rota, slow first month (Zwolle live, no other clubs)

	Mon	Tue	Wed	Thu	Fri	Sat
A	morning check, product	product, release 17:00	product	product, release 17:00	product, week review	helpline (alternate weeks)
B	Zwolle check-in, calls	visits	calls, letters	visits	admin, week review	helpline (alternate weeks)

About 45 hours a week each; most of it is selling (B) and finishing the product seams (A).

Rota at plan (10 clubs live, 1–2 onboarding at once)

	Mon	Tue	Wed	Thu	Fri	Sat
A	morning check, support	imports for new clubs, release	product	support, release	product, backups test	helpline if a club is in its first 4 weeks
B	support, calls	onboarding meetings	visits	onboarding meetings	invoicing, week review	helpline if a club is in its first 4 weeks

Support load is the limit to watch. Assume ~~2 hours a week per live club after its first month (an estimate; measure it at Zwolle)~~. At 10 clubs that is ~20 hours a week; at 16 clubs ~32 hours, most of one founder. So the "25 clubs" capacity in the CFO only holds if support per club stays low; Zwolle's first three months tell you.

4. Routines

4.1 Morning check (15 minutes, every working day)

1. Open the error overview of Supabase and Vercel: any errors since yesterday? Note them.
2. E-mail provider: any bounced or delayed login codes or invitations? If a club has more than a few, call the club before its members do.
3. Mollie (per club, via the club's dashboard if shared): failed payments or webhooks?
4. Support inbox and voicemail: reply to every club before 10:00, even if only "we're on it, you'll hear from us before 14:00".
5. Anything promised to a club for today? Put it at the top.

4.2 Onboarding a club (the core service, six weeks)

1. **Week –6**: contract signed with success criteria (offer B). Club starts its Apple Developer enrolment (D-U-N-S) and Google Play account; Mollie account if it has none. One contact person.
2. **Week –5**: club sends the export from its current system (E-Golf4U, Nexxchange, IntoGolf or Excel). Import into a test club first; check the counts with the club (members, families, membership types).
3. **Week –4**: logo and colours → `clubs/<club>/`, `brand.ts`, `pnpm club:assets <club>`, contrast test green. Base check: Greenside unchanged.
4. **Week –3**: build the app; submit to Apple and Google from the club's accounts. Order the printed guide (club's colours).

5. **Week -2:** board and 10-20 members test the app (the pilot group). Fix what they find.
6. **Week -1:** real import; check counts again; secretariat training (one hour, at the club).
7. **Go-live (day 0):** invitations in batches (not all at once on a Saturday); founder on site or on the phone all day.
8. **Weeks 1-4:** Saturday helpline; weekly call with the contact person; count active members against the success criterion.
9. **Week 12:** end of pilot: success criteria met? Club continues (licence starts) or stops and pays nothing, and gets its data export.

4.3 Release (protects the base)

1. Work only on the work branch; `pilot-v1` is never changed.
2. `pnpm typecheck && pnpm lint && pnpm test` and the database tests (`supabase/tests/run-local.sh`).
3. For changes in shared code: compare Greenside screen by screen with `pilot-v1` (base check).
4. New database change = new migration, tested; never edit an old one.
5. Release Monday to Thursday after 17:00; never on Friday, Saturday or in a club's launch week.
6. Check the morning after (routine 4.1).

4.4 A complaint or an incident

1. **Answer the same day**, by name, with a phone number (`founder/brand.md`, touchpoint 5).
2. A member problem (code doesn't arrive, can't book): fix it for that member first, then look for the cause. Note it.
3. A club-wide problem (no codes, booking down): call the club's contact person **before** they call you; say what is wrong, what you're doing, when you'll call back.
4. **A possible data leak** (member data seen by someone who shouldn't, a lost key): stop it, write down what happened, inform the club (the club is responsible for its members' data, Greenside processes it), and help it decide on reporting to the Autoriteit Persoonsgegevens, which must be **within 72 hours** of discovery ([Autoriteit Persoonsgegevens](#)).
5. Afterwards: one page, what happened and what changed, sent to the club.

4.5 Weekly and monthly

1. **Friday:** week review: the three marketing numbers, open tickets, support hours per club, anything promised.
2. **Friday:** restore one backup to a test environment and check it opens (monthly at least).
3. **Monthly, 1st working day:** licence invoices and SEPA collection; check payments a week later.
4. **Monthly:** printed guides for clubs onboarding in the next six weeks; reorder.
5. **Quarterly:** costs against `founder/numbers.json`; re-run the CFO if they moved.

5. Tools (the smallest stack)

job	tool	price	why
Product hosting	Supabase, Vercel, Expo, Resend	~€160 a month (CFO fixed costs)	already built on them
Bookkeeping, invoices, VAT	Moneybird	€15-29 a month	Dutch, bank link, invoices and SEPA
Licence collection	Mollie or the bank	~€0.13-0.25 per collection	clubs pay by direct debit
Support	a shared mailbox (Google Workspace or similar) + the helpline number	~€14 + €15 a month	one inbox, one number, both founders
Sales pipeline	Greenside HQ (already built)	€0	prospects, clubs, setup checklist in one place
Planning	a shared calendar	€0	release days, launch weeks, Saturday rota
Passwords and keys	a password manager with sharing	~€5 a month (estimate)	service keys never in chat or e-mail

6. Licences, registration and rules

Rules differ by situation and change; confirm each with the authority or a professional. Not legal advice.

- ☐ **Chamber of Commerce (KVK) registration** ~€ 85 once (sources differ: € 80–85; [Ondernemersplein](#), [KVK](#)). The VAT number comes with it.
- ☐ **Legal form**: VOF or BV. A BV needs a notary (~€ 400–800 extra, [Onderneming.nl](#)) but limits personal liability, which matters when you hold the data of thousands of members. Decide with the accountant.
- ☐ **AVG (GDPR)**: Greenside processes members' data for the clubs, so you need a **data processing agreement** (verwerkersovereenkomst) with every club, a **privacy statement**, a **record of processing**, and a list of **sub-processors** (Supabase in Frankfurt; Vercel, Resend and Expo are US companies, so mention the transfer basis). A data protection impact assessment is advisable for member data at this scale. The lawyer in the CFO's start-up costs covers this.
- ☐ **Data breach procedure**: report within 72 hours (routine 4.4).
- ☐ **Terms and conditions** and the **contract** with the clauses from the offer: pilot, success criteria, walk-away, data export, 12 months' notice and handover.
- ☐ **Apple and Google**: each club accepts the Apple Developer Program and Google Play terms itself.
- ☐ **Accessibility (European Accessibility Act)**: service providers that are microenterprises (fewer than 10 people and at most € 2 million turnover) are exempt ([CCPC guidance](#), [iubenda](#)). The app already aims for contrast $\geq 4.5:1$ and 44 pt touch targets; keep it that way, older members need it anyway.
- ☐ **Website**: cookie consent if you use anything beyond strictly necessary cookies.
- ☐ **Insurance**: professional liability and cyber (section 2).
- ☐ **Each club**: Mollie account checks, D-U-N-S number, its own privacy statement mentioning the app.

7. Risk register

#	risk	likely	how bad	plan
1	Members don't use the app at Zwolle (below 20% active by week 4)	medium	very high: no proof, no sales	stop outreach; fix adoption first (guide, invitations in groups, help at the clubhouse); measure weekly
2	Login codes don't arrive (spam filter, e-mail limit, provider outage)	medium	high on a Saturday	own domain with SPF/DKIM/DMARC; e-mail limit $\geq 1,000$ an hour; a second provider ready (Postmark); helpline script
3	Apple rejects or delays a club's app (4.2.6, 4.3, review)	medium	high: go-live slips	submit from the club's account, three weeks early; review account ready (<code>pnpm app-review</code>); ask App Review about per-club builds before the first submission
4	A founder is ill or leaves	medium over 2 years	very high: "two founders" is the top objection	both can run the morning check and the helpline; written routines (this file); passwords in a shared manager; a founders' agreement on what happens if one leaves
5	Data leak between clubs or of members	low (RLS and tests)	very high	pentest before go-live; club separation tested in <code>database.test.sql</code> ; incident routine 4.4; cyber insurance
6	A release breaks the base or a club's app	medium	high	release routine 4.3; never Friday or Saturday; base check; quick rollback by redeploying the previous version
7	The import goes wrong (wrong counts, families split)	medium	high: the board's first impression	import into a test club first; counts checked with the club twice (weeks -5 and -1)
8	Support swamps the founders as clubs grow	high after ~10 clubs	medium	measure hours per club from Zwolle; improve the guide and the app where questions repeat; hire part-time support before 15 clubs
9	A supplier raises prices or changes terms (Expo, Supabase, Apple)	medium	low to medium (costs are small)	costs are ~€ 160 a month; review quarterly; local builds as a fallback for Expo

#	risk	likely	how bad	plan
10	A slow sales year (clubs wait for a full season)	high	high: no pay for the founders	plan pay to grow with clubs; keep costs at ~€ 400 a month; decide the bridge (savings, part-time, a loan) before go-live

Open questions (need a quote or a decision)

1. Pentest: three quotes from Dutch firms, scope as in section 2.
2. Insurance: two quotes for professional liability plus cyber.
3. Lawyer: quote for the data processing agreement, privacy statement, terms and the club contract.
4. Printing: a Dutch quote for 1,000 A5 guides (8 or 12 pages).
5. Helpline number: Voys or a mobile provider, price.
6. Legal form (VOF or BV) and how the founders are paid: accountant.
7. Ask Apple App Review how they treat per-club builds of the same app (4.2.6 and 4.3) before the first submission ([Apple developer forum thread](#)).
8. Mollie's actual SEPA direct debit rate for the licence.

Launch plan

Launch day L = Monday 1 March 2027: Golfclub Zwolle's members get their app. No date was agreed yet; this is the date the marketing calendar assumes, before the season and before boards prepare the spring members' meeting. With the lead times in `founder/ops.md` (lawyer, pentest, Apple enrolment) the earliest realistic date is mid-January 2027, but members play little in January and a launch then wastes the reference. **Agree the date with Zwolle's board in week 1**; every date below moves with it.

Owners: **A** = founder for product and safety, **B** = founder for clubs and sales (`founder/ops.md`). Today is Thursday 8 October 2026.

1. Test before you spend

The big money in this plan is not the hosting (€ 400 a month) but **paying yourselves** (€ 5,000 a month, `founder/cfo.md`) and any outside money. The pentest (€ 7,500) and the lawyer (€ 2,500) are needed for Zwolle anyway: real member data never goes live without them. So the test decides **whether to start paying yourselves or raise money**, not whether to go live at Zwolle.

The fitting test for a subscription sold to boards: **real boards, the real price, a signature.**

Test 1 – before the pentest is booked (12 October – 18 December 2026)

- Zwolle signs the pilot contract: success criteria in writing, and the founding price (€ 399 a month) **from month 4 if the criteria are met.**
- 15 letters to clubs still on E-Golf4U or near Zwolle (marketing hook 1). No claims about Zwolle.
- **Success line: Zwolle signed by 13 November, and by 18 December at least 5 board conversations and 2 signed letters of intent** ("if Zwolle meets its criteria, we start a pilot in 2027 at € 399").
- Panel comparison: the panel says 0 of 20 buy now and 19 of 20 wait for Zwolle. So **zero firm orders is expected**; conditional letters are the honest measure. Fewer than 5 conversations from 15 letters means the message or the channel is wrong, not the market: rewrite and try 15 more. If Zwolle won't sign the paid follow-on, stop and go back to `/founder-offer` before spending more.

Test 2 – Zwolle's pilot (1 March – 24 May 2027)

- **Success line: 40% of Zwolle's members active in week 12** (the success criterion in the offer), Zwolle continues and pays from June, and **3 pilot requests from other clubs by L+90 (30 May).**
- If real adoption falls well short of 40%, trust Zwolle's members, not the panel: fix the product and the launch kit before selling to anyone else.
- Only when Test 2 passes: start paying yourselves step by step, or talk to lenders or investors with Zwolle's numbers.

2. The countdown

Weekly blocks, Monday dates. **Critical path** (moves L if it slips) marked .

week of	task	owner	done by
12 Oct	 Meet Zwolle's board: go-live date, pilot contract terms, success criteria, contact person, permission to use their name later	B	Fri 16 Oct
	Accountant: VOF or BV, how founders are paid	A+B	Fri 16 Oct
	Ask 3 pentest quotes, 2 insurance quotes, 1 lawyer quote (<code>ops.md</code> open questions)	A	Fri 16 Oct
	Protect main and pilot-v1 on GitHub (rulesets, still open)	A	Fri 16 Oct
19 Oct	 Zwolle starts Apple Developer enrolment (D-U-N-S number: 2–4 weeks), Google Play account, Mollie account checks	B (with Zwolle)	Fri 23 Oct
	KVK registration, business bank account, Moneybird	A	Fri 23 Oct

week of	task	owner	done by
	△ Lawyer starts: data processing agreement, privacy statement, terms, pilot contract	B	Fri 23 Oct
	Zwolle sends a test export from its current system	B	Fri 23 Oct
26 Oct	Test 1: list of 15 clubs, letters out	B	Fri 30 Oct
	Production accounts: Supabase EU (Frankfurt), Resend with own domain (SPF/DKIM/DMARC), Vercel, Expo, Greenside's own Apple account, password manager	A	Fri 30 Oct
	Book the pentest (3–4 weeks lead time), insurance in place	A	Fri 30 Oct
2 Nov	Product decisions the board asked for: bar-staff role, ball machine (Xafax) in or out of the pilot, who owns the member record when systems disagree	A+B	Fri 6 Nov
	Test import of Zwolle's export into a test club; check counts with Zwolle	A	Fri 6 Nov
	Calls to the 15 letters	B	Fri 6 Nov
9 Nov	△ Zwolle signs the pilot contract and the data processing agreement	B	Fri 13 Nov
	Production go-live steps from the README on the real accounts (settings, e-mail limits, MFA for admins)	A	Fri 13 Nov
16 Nov – 4 Dec	△ Pentest runs (1–2 weeks) on the production setup with test data	A	Fri 4 Dec
	Board conversations from Test 1; letters of intent	B	ongoing
	Printed member guide: text and design (Greenside layout, Zwolle colours)	B	Fri 4 Dec
7 Dec	△ Pentest report; fix every high and medium finding	A	Fri 18 Dec
14 Dec	Test 1 review against the success line	A+B	Fri 18 Dec
21 Dec – 1 Jan	Holiday buffer. Nothing planned on purpose	—	—
4 Jan	△ Pentest retest	A	Fri 8 Jan
	Website live (greenside.nl or alternative), LinkedIn company page, one-pager and letter template (brand.md)	B	Fri 8 Jan
11 Jan	△ Zwolle's app built from clubs/zwolle ; base check against pilot-v1 ; review account ready (pnpm app-review)	A	Fri 15 Jan
18 Jan	△ Submit to Apple and Google from Zwolle's accounts (6 weeks before L: room for one rejection)	A	Mon 18 Jan
	Saturday helpline: number, rota for the first four weeks, script for "my code didn't arrive"	B	Fri 22 Jan
25 Jan	Apps approved, kept unreleased; fix and resubmit if rejected	A	Fri 29 Jan
1 Feb – 12 Feb	Soft open: Zwolle's board and 10–20 members use the real app on test data; daily fixes	A+B	Fri 12 Feb
8 Feb	Order printed guides (~1 week delivery)	B	Mon 8 Feb
15 Feb (L-14)	Marketing calendar starts (marketing.md): list of 40 clubs, letter, first posts	B	per calendar
22 Feb	△ Real import of Zwolle's members; counts checked with Zwolle; secretariat training (1 hour, at the club)	A+B	Wed 24 Feb
	Go / no-go with Zwolle's contact person (checklist below)	A+B	Fri 26 Feb
1 Mar	L: launch day	A+B	—

Go / no-go checklist (Friday 26 February): apps live in both stores under Zwolle's name · import counts signed off by Zwolle · test login codes arrive within 1 minute at Gmail, Outlook and KPN addresses · pentest retest clean · data processing agreement signed · printed guides at the club · helpline rota and number working · rollback tested. Any "no" → move L by a week, tell Zwolle the same day.

3. Launch day: Monday 1 March 2027

B is at Zwolle's clubhouse all day; A works from a screen with the monitoring open. No outward campaign today (marketing.md): all attention on Zwolle.

time	who	what
07:30	A	Morning check (ops.md 4.1): errors, e-mail provider, database. All green or stop
08:00	A+B	10-minute call: go. Agree the stop rule (below)
08:30	B	At the clubhouse: help table with printed guides, a sign "Hulp bij de nieuwe app"
09:00	A	Batch 1: invitations to the board, committees and volunteers (~100). Watch delivery
10:00	A	Batch 1 check: $\geq 90\%$ delivered, first logins work → go on
10:30	A	Batch 2: ~300 members (first part of the list)
12:00	A+B	Midday check: delivery rate, logins, questions at the table and on the phone
13:30	A	Batch 3: ~300 members
15:30	A	Batch 4: the rest
16:00	B	Short news item in the app for Zwolle's members (text agreed with Zwolle)
17:00	A	Count: invited, delivered, logged in. Note every question asked today
18:00	A+B	Short report to Zwolle's contact person: numbers, problems, what happens tomorrow
18:30	B	LinkedIn: nothing yet. The launch post goes out tomorrow (marketing calendar)

Stop rule and what to do when something breaks (from the risk register in ops.md):

- **Codes or invitations not arriving** (delivery below 90% for a batch): pause the next batch, check the e-mail limit and the provider; switch to the second provider (Postmark) if needed. Tell the help table what to say.
- **Login or booking errors for many members:** pause invitations; if it's a release problem, redeploy the previous version (rollback tested on 26 Feb). Call Zwolle's contact person before members do.
- **Wrong member data** (wrong name, family, membership): stop invitations at once, fix the import, apologise to the affected members by e-mail from the club.
- **Anything that looks like members seeing another person's data:** stop, follow the data-breach routine (ops.md 4.4, 72 hours).

4. The first 30 days

Weekly numbers (every Friday, in the week review):

number	source	target	change something when
Zwolle members active this week (+ all members)	app	20% in week 4, 40% in week 12	below 10% at day 14 or 20% at day 28 → stop outreach, fix adoption first
Invitations delivered / accepted	e-mail provider, app	$\geq 95\%$ delivered	more than 2% bounced → clean addresses with Zwolle, check the domain setup
Support hours for Zwolle	own log	falls each week	above 10 hours a week after week 2 → the guide or the app is unclear; fix what repeats
Board conversations booked	marketing log	3 a week	below 2 a week for two weeks → rewrite the letter, phone first, ask Zwolle for an intro
Pilot requests / letters of intent	marketing log	3 by 30 May	0 after 10 conversations → back to /founder-offer
Paying clubs vs break-even	CFO	0 in the first 30 days (Zwolle is in its free pilot); break-even 2 clubs unpaid, 16 with pay	– the money test is Test 2, not the first month

Reviews (A+B, one hour, written notes):

- **Day 7 (Mon 8 March):** Did every member who wanted to log in manage it? What were the five most asked questions, and which ones can the app or the guide answer instead of us? Is Zwolle's contact person happy, in their own words? Anything we promised that we haven't done?
- **Day 14 (Mon 15 March):** Are we at 10% active or more? Which groups are missing (age, membership type)? Is the Saturday helpline still needed after week 4? How many board conversations, and what objection came up most? Does it match the panel?
- **Day 30 (Wed 31 March):** 20% active? Support hours falling? Is Zwolle willing to take reference calls, and which numbers may we share? Do we need to change the offer, the price or the launch kit before the next club? Re-run the CFO with the real support hours.

Next: `/founder-plan` compiles everything into the business plan.

The panel is simulated buyers and the numbers are projections from your inputs. Confirm demand with real customers and costs with real quotes before you spend. Not financial, legal or tax advice.
